INDUSTRY AND PRODUCT CLASSIFICATION

Every product has a unique classification number, known as a harmonized system code, HS Code.

A HS Code is the standard numerical method that is used globally across international trade in order to accurately identify traded products at a basic 6-digit level and 8 or 10-digit levels for country-specific definitions.

A HS code is used by customs authorities in every part of the world in order to allocate the correct rate of duty and tax for each product.

IDENTIFY MARKET ENTRY REQUIREMENTS

Determine the import requirements for your products as each country has different market entry requirements including import quotas, licensing, labeling and tariffs.

Resources:

- [USDA's Food and Agricultural Import and Regulations Standards Reports \(FAIRS\)](#)
- [Global Agricultural Information Network \(GAIN\)](#)

PREPARING EXPORT DOCUMENTATION

Proper documentation is crucial for exporting livestock genetics.

Please refer to the [APHIS Import/Export website](#) for country-specific documentation requirements and to view the export inspection facilities (EIF) list.

Also, DATCP offers an [Export Certificate Guidelines document](#) that outlines certificates for livestock genetics.

Be sure that documents are *complete and accurate*.

FINDING QUALIFIED FOREIGN BUYERS & HOW TO PREPARE FOR MEETINGS

There are a multitude of avenues to attract and obtain foreign buyers that are fit for your product(s). Consider the following:

- [U.S. Livestock Genetics Export, Inc. \(USLGE\)](#)
- [USDA International and Domestic Trade Shows](#)
- [DATCP International Agribusiness Center Calendar](#)
- [WEDC Global Trade Ventures](#)

FOLLOW-UP WITH BUYERS

It's important to follow up with buyers. To be successful in developing trade relationships be sure to:

- Correspond quickly after meeting buyer(s)
- Provide information requested (accurate pricing, quoting of products and shipment)
- Provide your contact information (email, phone number, website)
- Follow up on the follow up
